

What has been keeping us busy?

Modifications and adjustments as a response to market requirements.

Broiler Feeder Pan

With only 3 pillars and a modified shape, the birds now have easier access to the feed.

The pan can rotate 180° on the pipe, allowing it to be empty easily at the end of the flock.

Assembly of the pan onto the pipe is simple and easy with Plasson's Press-In Lock.

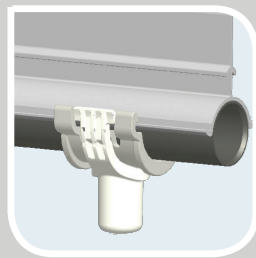

Improve your bottom line - upgrade to the Plasson feeder.

Turkey Feeder Pan

Made stronger to last longer.

The pan is suitable for light or heavy turkeys and can be supplied with or without a collar.

Snap on Plug for Nipple

Now it's even easier to assemble or disassemble the plug from the Nipple line.

Global Presence - Local Commitment

What's new in Plasson?

New Products and systems as a result of continuous presence in the market, and innovative thinking.

Plasson's Water on Demand
24/7 Pressure Management

Allows you to easily control and manage the water pressure through your entire drinker lines. Manage each shed from one central location according to your birds' changing demands during a 24 hour period and during the grow-out.

Plasson's W.O.D uses the water itself to control the pressure and does not require additional, expensive infrastructure installation.

Easily retrofit every Plasson watering system

External Connector

Allows external connection of the nipple pipe lines.

SECS

Super Easy Chick Start

Supplies access to clean, fresh water to help your day old Pullets with a better start.

Easily adapts to any Plasson nipple system.

Improved Chick Starts / Reduced mortality / Easy access to water

SESA

Adjustable Super Easy Start For Turkey Poults

Supplies clean fresh water instantly on demand.

Super Easy Start for Turkey Poults out-performs other watering systems in bird health, livability and weight gain.

The system is designed for day old to six week toms and hens.

Controller for Automatic Flushing System

The controller is specially designed for Plasson's automatic flushing system. Fresh water for the bird / Colder water for the birds in hot climate / Cleaner system / Improved system longevity / Labor saving.

Turkey Poults Feeder Pan

Improve performance by replacing outdated feed pans.

The revolutionary design of the Plasson Feed Pan has proven results for achieving better feed conversion and heavier weights.

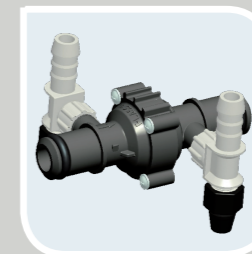

Easily attaches to most feed systems.

Grill-less pan design allows easy access.

New feed regulator design increases flood feeding.

Retaining lip improves feed efficiency.

Adjustable feed regulator provides optimum feed levels for every turkey breed.

10 cm. Slope Regulator

The cost effective solution for sloping houses – Now also in 10cm. pressure break version.

No need for a bypass during flushing.

No need for adjustment over the brood period.

Sealing Plug for Mid Line Pressure Regulator

Using this plug enables conversion of

Mid Line Pressure Regulator (two lines)

Into a Head Line Pressure Regulator (one line)

Ask your nearest dealer for the new Plasson products.
