

Safe, long-lasting, quiet.

Our Family Nest is highly flexible, as it can be developed on one or two floors according to the client's objectives. The structure design facilitates access to the second tier, therefore guaranteeing maximum use of the available space. Furthermore, the nests can be positioned centrally or against the wall.

- **Accessibility**
- **Flexibility**
- **Maximum use of available space**
- **Durability**
- **Animal friendly**

A soft AstroTurf mat, creates a clean and comfortable area for the laying of eggs.

The perforated polypropylene belt keeps the eggs clean. Speed can be adjusted according to the quantity of eggs, facilitating collection by the operator.

The expulsion system located at the centre of the nest is easy to access for installation and maintenance purposes. The slow movement of the expulsion panels gently accompanies the animals out of the nest during night hours, eliminating problems related to hatching or overcrowding.

Technical features

Family Nest
